

# OUR PROCESS

DIGITAL COMPONENT CONSTRUCTION IS LIKE CONVENTIONAL CONSTRUCTION...  
*on steroids.*

## 1: YOUR NEEDS. YOUR SPACE.

Whether you're changing existing commercial space, designing a new medical clinic or refreshing a campus, we will work with you to identify the right solution for your needs.

## 2: DESIGN + SUPPORT.

With a vast collection of standard finishes and fabrics, smart tools including VR and the Falk DesignMix, designing to use every inch of an environment is easy.

## 3. OUR MANUFACTURING.

Next, we manufacture each component with precision and quality control in our state-of-the-art factory. And bonus: because we are building the components, we also control the lead times.

## 4. WE DELIVER.

When all your components roll off the factory floor, we flat pack stack them for shipping. And we load the truck in reverse order so the first thing unloaded at the job site is the first thing you need.

## 5. THE INSTALL.

It's quick, easy and clean. Installing Falk components takes a fraction of the time of conventional construction, creates zero dust and virtually no waste.

## 6. READY FOR TOMORROW.

With Digital Component Construction you get back to work faster in a higher performance environment that enhances productivity and is ready to adapt to your changing needs.
